CLAIM AMENDMENTS

1. (Currently Amended) A method of transferring user preferences from one computer to another, comprising the steps of:

providing a transportable data storage medium;

recording on the transportable data storage medium, at a first computer, unique information relating to a particularly user's computer configuration preferences, including information relating to the user's preferred desktop graphical interface;

receiving the transportable data storage medium at a second computer; and

at least temporarily configuring the second computer in accordance with the information stored on the transportable medium.

2. (Canceled)

3. (Original) The method of claim 1, wherein storage medium includes information relating to wired or wireless network or dial-up communications preferences.

4. (Currently Amended) The method of claim 1, wherein storage medium includes information relating to one or more user files or information relating to a user file.

5. (Original) The method of claim 1, further includes the step of accessing a remote location to at least temporarily configuring the second computer in accordance with the information stored on the transportable medium.

6. (Original) The method of claim 5, wherein the remote location includes data or an application program desired by the user at the second computer.

7. (Original) The method of claim 1, wherein the step of at least temporarily configuring the second computer occurs through re-booting the second computer or through a different user log-on.
